- **Mainly worked on Java, Hibernate, and Spring.**

- **Experience on Micro Services (Zuul, Eureka, Ribbon,cloud).**

- **Experience on Web Services Rest API (Spring4, Spring Boot).**

- **Experience in using Spring Security (Basic, JWT)**

- ∉ **Experience on Oracle 11G, MySql , PostgreSQL, MongoDB.**

- ∉ **Experience in using Apache Tomcat 8.0, Weblogic 9.0.**

- ∉ **Experience in using GIT and SVN version control tools.**

- ∉ **Experience with Maven, JUnit, Log4J.**

- ∉ **Experience with Tracking Tools – Jira**

- ∉ **Knowledge of JSP, SERVLET, JDBC**

- ∉ **Knowledge of HTML, CSS, Javascript And Angular 6.0.**

- ∉ **Knowledge of Spring Boot thymeleaf.**

EDUCATION PROFILE

- * *Master of Computer Application (MCA)* From Institute of Engineering And Technology Faizabad (UP) in 2019 with percentage 76.25

- * **Bachelor of Computer Application (BCA) from Dr. Ram manohar Lohia Avadh University Faizabad (U.P) in 2016 with percentage 65.80**
- * *Intermediate from Up BOARD in 2013 with percentage 68.80*
- * *HighSchool from Up BOARD in 2011 with percentage 69.66*

Project Profile

#Project 1   : **Vestige**

Role	:	**Team Member**
Team Size	:	**9**
Duration	:	**Jan 2021 to till date**
Implementation	:	**JDK 1.8, Maven, Spring Boot, Spring-Jpa-Data, Microservices Log4j, DevTool, Swagger, MongoDB, Apache Kafka, JWT, Elastic Search, Git.**

Project Description:

Vestige brings you the all-new Vestige Online Shopping App, that gives you the convenience of 24x7 online shopping and empowers you to manage your business at your fingertips. This all-rounder App is GPS integrated to provide you with the accurate information as per your location and helps you shop your favorite Vestige products.
With this App, not only you can get a home delivery but also book & collect your products from the nearby Vestige stores.

Role and Responsibilities:

- Worked on Requirements gathering of projects and responsible for improvement into the current project.
- Responsible for testing & quick fixing the issues.
- Working Experience of Agile Methodology.
- Responsible for coordinating with the client for best possible productivity.

#Project 2   :   **Jellyfish**

Role	:	**Team Member**
Team Size	:	**12**
Duration	:	**Feb 2020 to till date**
Implementation	:	**JDK 1.8, Maven, Spring Boot, Spring-Jpa-Data, Microservices Log4j, DevTool, Swagger, MySql, Apache Kafka, JWT, Liquibase, Elastic Search, Git.**

Project Description:

Jellyfish Order Management Software is a mobile & desktop app where retailers can easily place orders with all of their suppliers with the simple push of a button. Jellyfish ordering is fast, simple, and efficient saving retailers and suppliers time and money.
This easy-to-use ordering app solves complex logistics between buyers and their suppliers in a shared ecosystem. It gives suppliers an electronic customer engagement tool that enables all the visibility and collaboration you need for success.

Role and Responsibilities:

- Hands on in Spring Boot.
- Involved in Coding for Services and Spring Controllers.
- Creating JPA Repository and implemented business logic for them.
- Responsible for writing spring beans and injecting the spring beans for user
- Analyzing the requirements and implementation of the module.

#Project 3   :   **Tender Management System (TMS)**

Role	:	**Team Member**
Team Size	:	**6**
Duration	:	**March 2019 to Feb 14 2020**
Implementation	:	**JDK 1.8, Maven, Hibernate, Spring Boot, Spring-Jpa-Data, Spring Boot Security Log4j, DevTool, Swagger, PostgreSql, Tomcat 8.0**

Project Description:

Our Tender Management System (TMS) is provide an online service that helps suppliers and buyers to interact with each other to achieve prominent efficiency in all aspects of a tendering process. Whether it is complex tendering or simple RFP/RFQ process, Tender Management helps an organization in executing an effective E-procurement strategy and make your procurement or tendering function hassle-free. It takes care of the complete procurement life cycle, starting from the vendor or supplier registration process until awarding the contract. By using this solution organizations can ensure the transparency of the entire tender management process.

Role and Responsibilities:

- Writing Business logic using spring boot

- Involved in Coding for Services and Spring Boot Controllers.

- Developed spring bean and Dao beans for implementing these business rules of each operations.

- Responsible for writing spring beans and injecting the spring beans for user information module and services modules by using IOC.

- Implemented Persistence Component using jpa for services module and information module by using Association.

PERSONAL PROFILE

Father's Name	:	Mr. Ram Keval
Date Of Birth	:	20 Jul 1996
